WETSUITS

**NEW
2023**

J70

The softest, warmest and "stretchiest" neoprene that you can buy, combined with a premium look and textured camouflage: The J70 is the pro's choice cold water wetsuit. The next generation open cell & smooth skin neoprene guarantees comfortable spearfishing sessions even over many hours.

Go fishing as long as you like - you will never have to leave the water too early again with an OMER J70 wetsuit.

FEATURES AND BENEFITS

- S-Foam with an elongation of 480% and a shore hardness of 66 sHa.
- Compared to J60, (previous model), the J70 features a material that stretches 20% better and is 6% softer.
- Avoid the "wind-chill-effect" and be able to dive deeper thanks to the glide skin surface neoprene
- Nylon lined bindings at wrists, ankles and face contour enhance the durability
- 10mm reinforced, lined anti-slip loading pad for safer speargun handling
- Limestone based, petroleum free eco-sustainable neoprene
- Compostable plant-based starch protection bag to avoid plastic pollution
- Internal lined neoprene around the ears avoid the vacuum effect on fast descends.

TECHNICAL SPECIFICATIONS

Thickness: 3, 5 mm

Material: Preformed lined/ open cell

Sole: Highly durable POWERTEX®

mmMM	JACKET	PANTS
5	-	SU0180101 S-2XL

SIZE: S - M - L - XL - 2XL

1 High-stretch, open cell smoothskin neoprene, limestone based, oil-free

2 Minimalized, seamless panel distribution: less seams, more stretch.

3 Quick-dry, warmth retention

4 External smooth skin "anti-windchill" effect

5 10mm reinforced lined anti-slip loading pad for safe speargun handling

6 Internal lined neoprene around the ears avoid the vacuum effect on fast descends

OTTER

RED

OTTER

REDSTONE

The RED STONE's high visibility at the surface classifies it as one of the best wetsuits for safety purposes. As the diver descends, the red color is naturally absorbed by the underwater light conditions and transforms into brown camouflage, which makes hunting perfectly efficient.

FEATURES AND BENEFITS

- Excellent thermal insulation, thanks to the open cell construction and overlapping lower back area.
- High-stretch neoprene glued and blind stitched limits water entry to an absolute minimum, resulting in a perfectly warm suit under many conditions.
- Internal double lined neoprene near the ears allow easier equalization, by avoiding the sucker effect (vacuum around ears).
- Hood equipped with drain system evacuates the air trapped in suit.
- Eco sustainable: Limestone based, petroleum free neoprene and a plastic free packaging.

TECHNICAL SPECIFICATIONS

3D photographic camouflage

Thickness: 3, 5, 7mm

Material: Open cell/ Lined 90% Neoprene 10% Nylon

Closure system: Double clip beaver tail

Type: Hooded two-piece (Jacket and pants)

Wrist, Ankle, and face seals (Nylon reinforced on 5mm & 7mm, 3mm has high stretch fused cuffs)

Reinforced, large chest loading pad for comfortable gun loading.

Abrasion resistant knees

SIZE: 2-3-4-5-6-7

HOLOSTONE

High-performance wetsuit with photographic camouflage, ideal for spearfishing shy or vary fish. The premium ultra-flexible neoprene provides excellent resistance to thinning and keeps the diver warm even after long hours in the water.

FEATURES AND BENEFITS

- Excellent thermal insulation, thanks to the open cell construction and overlapping lower back area.
- 3d camouflage, obtained by alternating extremely clear and blurred areas, breaks the hunters' profile in the eyes of prey.
- Internal, double lined neoprene near the ears allow easier equalization by avoiding the sucker effect (vacuum around ears).
- Hood equipped with drain system evacuates the air trapped in suit.
- Eco sustainable: Limestone based, petroleum free neoprene and a plastic free packaging.

TECHNICAL SPECIFICATIONS

BLACKSTONE

High performance wetsuit, with photographic camouflage, ideal for spearfishing in various conditions: Reef or Oceanic environment alike, BLACK STONE works magic to make you "invisible". Excellent thermal insulation and extra stretch thanks to open cell/lined neoprene.

FEATURES AND BENEFITS

- High-definition camouflage blurs the point of reference against your background.
- Internal, double lined neoprene near the ears allow easier equalization by avoiding the sucker effect (vacuum around ears).
- Hood equipped with drain system evacuates the air trapped in suit.
- Eco sustainable: Limestone based, petroleum free neoprene and a plastic free packaging.

WETSUITS

BLACKSTONE 1.7 MM

OMER's BLACK STONE wetsuits have always been a top choice of spearos in warm water hunting grounds. The 1.7mm version of the BLACK STONE is made of the same material as the cold water versions but it comes with internal lining - simple and quick to don, soft and easy to wear.

FEATURES AND BENEFITS

- Two piece combo: Hooded jacket and pants.
- 1.7mm thickness for warm water hunting or pool training.
- Lining on inside and outside for easy. don/doffing - no lubricants required.
- Velcro closure beavertail
- Glued and blind stitched (GBS) construction for minimal water entry.
- Eco sustainable: Limestone based, petroleum free neoprene and a plastic free packaging.

TECHNICAL SPECIFICATIONS

140° COMFORT

Neoprene socks are widely used to provide extra warmth while wearing full-foot fins. It's important to provide good thermal insulation but at the same time, they also need to provide a secure connection to the rubber foot pockets. Spear socks for coastal spearfishing also need a strong protection on the outside sole when changing/walking to the fishing spot.

The COMFORT socks combine outstanding thermal insulation with an anti-slip smooth skin sole. They are lined on the inside for easy donning and smooth skin on the outside, so you don't feel the wind-chill effect when wearing them outside of the water. Thanks to their non-slip sole and heel, they connect perfectly with the footpocket for a 100% efficient fin stroke.

FEATURES AND BENEFITS

- Ergonomically preformed at 140degree angle: Best fit and comfort = improved blood circulation and warmth.
- Left and right fit for extra comfort.
- Soft, laminated non-slip texture for highest stroke efficiency.
- Plastic free packaging with plant-based sustainable materials.

TECHNICAL SPECIFICATIONS

Thickness: 3, 5 mm

Material: Preformed smooth skin / Inside lined

Sole: Anti-slip texture for a perfect grip

140° DURABLE

Neoprene socks are widely used to provide extra warmth while wearing full-foot fins. It's important to provide the best thermal insulation, so you don't have to wear too thick neoprene socks for your fin footpockets. Spearo socks for coastal spearfishing need a strong protection on the outside sole for walking over difficult terrain to your fishing spot.

The DURABLE socks combine outstanding thermal insulation with long lasting POWERTEX soles. They are open cell on the inside for the best thermal insulation and lined on the outside for extra durability.

FEATURES AND BENEFITS

- Ergonomically preformed at 140degree angle: Best fit and comfort = improved blood circulation and warmth.
- Left and right fit for extra comfort.
- Open cell inside, nylon lining outside.
- Most durable POWERTEX sole material
- Plastic free packaging with plant-based sustainable materials

HOLOSTONE

These gloves are the perfect match for your coastal spearfishing camouflage - they help to hide hand movements while hunting and often make a difference in the approach of predators.

They are lined on both sides, very durable and specifically protected with a dotted surface on the inside. This not only protects the neoprene from cuts and abrasion but also helps to get a good grip on line and fish.

SIZE: 2 - 3 - 4 - 5 - 6

AQUASTRETCH

The Omer Aquastretch gloves are the perfect hunter gloves. These gloves are designed for spearfishing, reinforced with larger silicone dots, allowing the Hunter to Grab on to Rocks with the left hand while Shooting with the right hand. The right palm has less reinforcement to help with any loss of sensitivity while holding a speargun.

- Super-Stretch Aquastretch Gloves
- 2 or 4 mm Neoprene Nylon lined gloves
- Ergonomically Designed
- Intended specifically for Spearfishing
- Lining material stretches up to 250%
- Left glove: Reinforced with larger silicone dots
- Silicone Dots: Allows Hunter to Grab on to Rocks
- Right-Palm Smooth for Sensitivity while Shooting

mm	GLOVES

4	GL11411 1-5

SIZE: S - M - ML - L - XL

HIGH RESISTANT

These gloves are called "High resistant" for a reason: They protect your hand and fingers from cuts and scratches, spiky fish and sharp objects.

Palm and fingers are reinforced with corrugated black latex for a non-slip grip and compared to other grip gloves, do not create any "squeaking" noises under water.

- Fabric and coating are level 3 puncture resistant and level 5 cut resistant
- Palm and fingers are reinforced
- Available Sizes: M, L, XL

GLOVES
GL1810110 M-XL

SIZE: M - L - XL

WITH SEAL

- Socks made of 3 and 5mm double-lined neoprene.
- Smooth neoprene on the outside ankles for a perfect seal.

NEOPRENE VALVE "LIQUID OUT"

A "must have" for the dedicated spearo, who spends several hours in the water. The OMER "pee valves" are easy to install and thanks to the shape and construction, keep the cold water out during your time in the water.

STANDARD
MP134123

NEOPRENE GLUE

Created specifically for modifying or repairing a spearfishing open cell or smooth skin wetsuit. Easy to use, it guarantees a safe result that is reliable and very quick - even for the most delicate repairs.

NEOPRENE GLUE
MP135111

CHEST PAD REINFORCEMENT

Makes any wetsuit ready for spearfishing: This chest pad should be applied on the wetsuit at the height of the sternum to increase the protection when loading a speargun with rubber bands. The exterior of this accessory has been designed to prevent the slipping of the gun when you are charging it. Simple and fast to apply.

CHEST PAD REINFORCEMENT
MP134111

QUICK RELEASE

Specific back harness featuring the perfect quick-release system: Just unclip the chest button - and the complete harness will open up and instantly release the weight from you. 6 back pockets and 2 side pockets distribute the weight.

It is possible to use both our specifically designed 600g flat weights or "homemade" flexible shot weights.

The SAFETY POINT on the back is reflective, so your buddy can spot you from the surface and provide better safety for you.

FINS

**NEW
2023**

DEVILRAY

Pure and minimalistic design, these fins don't need bells and whistles, they are strong, efficient and stand for the purity of spearfishing.

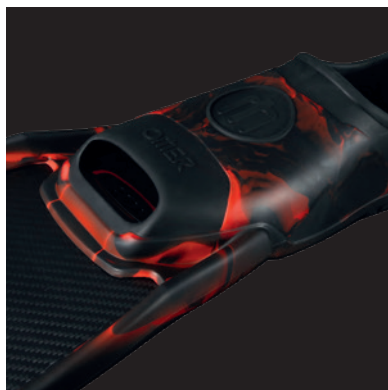

FEATURES AND BENEFITS

- **Bi-Material foot pocket:** the strong EXO structure transmits your kick force directly into the blades. The inner section provides comfort with a soft fit and prevents pressure points or friction areas.
- **Blades:** super-reactive 100% Carbon, 3k woven, multilayered blades with an optimized angle for spearfishing of 22° - this keeps the blades efficiently in the water and helps to reduce the "kick noise" at the surface.
- **Rails:** while the carbon layers are gradually decreasing towards the fin tips, the custom designed water rails increase in height. The combination of both uses the full 800mm length of the blades for the optimal water channel propulsion.
- Full size ribs protect the lateral sides of the blades from scratches and damage - the specific tips of the blades are shaped inwards for a better fin tip protection.

TECHNICAL SPECIFICATIONS

Blade Material: 100% carbon, 3K woven
Foot pocket: Bi-material for comfort and power (Soft 55° Sh, Hard 85° Sh) Redstone camouflage
Shape: inside tip protection
Blade length and width: 800mm x 195mm
Angle of blade: 22,0°
Rails: Progressive rails for water channeling

FINS

STINGRAY DUAL CARBON

The Dual Carbon, made of a moderately angled 100% enthusiast divers. The STINGRAY footpocket fits like a shoe and provide the perfect leverage of up and down strokes.

FEATURES AND BENEFITS

- Maximum Performance: Heel section of the blades is sandwiched, which offers extra durability and a high flex to power ratio.
- Reduced strain: Carbon blade at 22° angle for optimal thrust power and less strain on knees and ankles.
- Comfort: Foot pocket based on dual thickness material.
- Thicker material provides efficient energy transfer from the foot into the blade. Thinner material is more flexible to provide soft fit and avoid rubbing.
- Sizes 35/36 and 37/38 come with dual material DEVILRAY footpockets: Soft on the inside, strong on the power transmission zones

4 Very high flex to power ratio

STINGRAY EVO

These Fins are wider than average and provide a high thrust. An oval water channel is placed in the low-flex zone that increases the hydrodynamic efficiency without sacrificing any thrust. Use less muscle power for more propelling force!

FEATURES AND BENEFITS

- **Maximum Performance:** The hole acts as a stabilizer by channeling water vertically through the canopy. The rough part on the front of the canopy allows better grip during the thrust phase and the flap at the end of the canopy gives more uniform thrust efficiency.
- **Comfort:** Foot pockets based on aid in energy transfer and less strain on ankles and toes.

TECHNICAL SPECIFICATIONS

Blade Material: Polypropelene

Foot pocket: Dual thickness Thermo rubber
(Soft 55° Sh, Hard 85° Sh)

Construction: Modular

Blade length and width: 780mm X 210mm

Angle of blade: 21°

Interchangeable blades: Yes

EAGLERAY

A safe bet in comfort to thrust ratio, recommended for all level of divers who wish to explore deeper and further.

The blades are produced in a low modular polypropylene and they feel nice and soft while providing smooth and steady power. The comfortable thermo rubber footpockets provide an excellent power/flex ratio. The angle between footpocket and blade is 21°. It is a powerful fin, but easy to use, for beginners as well as advanced spearfishermen.

FEATURES AND BENEFITS

- Maximum Performance: Polypropylene blades with water rails and soft V-tip promote hydrodynamics and optimal power output.
- Reduced strain: Four channels on the blade direct water flow along the surface for efficient energy transfer and effortless movement.
- Comfort: Thermo rubber foot pockets allow a strong energy transfer through your legs into the foot and directly into the blades.

BLADE SKINS

Customize your blades, while protecting it from UV rays, scratches, and saltwater corrosion, with these high-end super flexible adhesive OMER Blade skins. Skins work like magic to give a makeover to fins.

FEATURES AND BENEFITS

- This state-of-art, easy to apply material fits long freediving or spearfishing fins and can be used even on structured blades.
- Can be applied on fiberglass, carbon fiber or even polymer fins with varying surface contours.
- Will perfectly form to curves and moderate edges typical on polymer fins.
- They remove easily without leaving residue, allowing easy installation for a next set of skins.

TECHNICAL SPECIFICATIONS

Dimension: 800mm x 220mm

Style: Blackstone, Redstone, Holo stone, Carbon

Material: High quality white polymeric Vinyl

Application surfaces: Flat, Simple curves, Gentle corrugations

Temperature: -40°C to +80°C

Durability: Up to 7 years

Content: 2 pieces (one pair) of blade skins

OMER

OMER

NEW
2023

ALPHA WOLF

The ALPHA WOLF is OMER's most advanced mask for spearfishing: It combines a wide-angle marine vision with the latest lens technology and a full hydro 3D camo effect.

The highly durable mirror stalking lenses help to hide the hunter's eyes from fish, which are often scared by human's eyes.

The color spectrum of the marine vision lenses help to improve contrast: They reduce red/orange color spectrum and in return, increase blue/green: A fish silhouette gains distinction and becomes more visible.

Full hydro 3d camo effect (even the mask's strap!) provides a camouflage that conceals the contour of your head and blends you perfectly into the hunting ground.

The ALPHA WOLF mask integrates its frame into the surprisingly soft silicone skirt for exceptional comfort and super easy access to the textured nose pocket for a quicker and more precise equalization.

TECHNICAL SPECIFICATIONS

Colors: RED STONE camouflage

Lens: high contrast amber mirrored marine vision lenses

Mask volume: low

Strap: 3D hydro printed silicone strap

Included: Air mesh mask case

ALPHA WOLF
MS5220697

WOLF

The Wolf mask combines a crystal-clear vision and a wide-angle view with an ultra-compact design. It integrates the frame into the surprisingly soft silicone skirt of 45 SH for exceptional comfort and super easy access to the nose pocket for a quicker and more precise equalization. The proximity of the lenses to the face reduces internal volume and increases field of view.

FEATURES AND BENEFITS

- Low volume: A low internal volume reduces the positive buoyancy to a minimum.
- Pressure reduction zones incorporated into the soft hypoallergenic silicone skirt near the forehead and nose section help relieve the pressure on the face of diver.
- Easy equalization: Due to the integrated frame, the skirt around the nose pocket leaves plenty of room for fingers even in thick gloves to equalize quickly and efficiently.

TECHNICAL SPECIFICATIONS

Colors: Red/Black, Gray/Black

Lens: Independent lens, Tempered glass- No tint

Mask Volume: Low

Strap: Silicone Extra wide, snorkel fit attachment points.

Nose clip textured section (outside and inside)

ALIEN

Classic and sturdy, this specific spearfishing mask has a very low internal volume and a great field of vision.

Designed and produced in cooperation with injection technology experts, the lenses are placed in a retracted position for improved hydrodynamics and reduced drag. It fits almost everyone!

FEATURES AND BENEFITS

- Sealing: Hypoallergenic Silicone skirt adapts smoothly to the contours of face, thus promoting comfort and waterproofness.
- Buckles attached to the skirt and associated with notched strap on each side of the mask allow easy and very precise adjustment of the mask, even with gloves and do not create as much drag.

TECHNICAL SPECIFICATIONS

MASKS & SNORKELS

AQUA

The Aqua mask was developed for deep spearfishing. The inner volume of 110cm³ makes it one of the smallest masks on the market. Despite that, it has a good vision due to the studies of an accurate distance of the lenses and their geometry. The soft 60 shore silicone and a rough texture of the nose area allows to obtain a great seal with comfort. The strap is made of a more rigid silicone to increase its durability. It is adjustable by the two clips on the side of the mask which ensures a great fit to the face.

TECHNICAL SPECIFICATIONS

Colors: Black

Lens: Independent lenses, Tempered glass- No tint

Mask Volume: Low 110 cm³

Strap: Silicone Extra wide, snorkel fit attachment points

Nose clip textured section (outside and inside)

AQUA BLACK

AIR MESH CASE

Protect your most important equipment: Your mask is the device that provides you vision underwater.

While the hard shell side protects the mask lenses and frame, the soft mesh side packs the mask streamlined and safe. The ventilated, AIR MESH material even helps drying while in storage and two extra inner pockets can be used for storing accessories or keeping your smartphone safe while you are in the water.

FEATURES AND BENEFITS

- Perfect for low volume Spearo masks!
- Soft Airmesh to streamline the packability
- Two extra pockets for Anti-Fog, Smartphone etc.
- **Packaging:** FSC certified cardboard header card

ZOOM

The Zoom snorkel with high-definition 3D camouflage perfectly aligns with the cosmetics of stone wetsuits and Wolf Masks.

FEATURES AND BENEFITS

- Hydrodynamics: Rigid tube made of TPU, does not break even when hit against the rocks or in strong current.
- Comfort: the silicone mouthpiece is ergonomically designed to be very comfortable in the mouth.
- Ease of breathing: The internal diameter of the tube is 20mm, which optimizes the Air flow rate.

TECHNICAL SPECIFICATIONS

Colors: Redstone, Blackstone, Holostone

Mouthpiece: Hypoallergenic silicone

Tube: Semi-Flexible High-quality Thermo polymer urethane (TPU)

Strap: Silicone Extra wide, snorkel fit attachment points

Includes snorkel keeper

BREEZE

Spearfishing snorkel made of non-reflecting satin finish, perfectly reduces its visibility for a better camouflage. Molded with 2 different types of material and hardness. Lower part of the tube made with semi rigid thermo polymer helps avoid annoying vibrations during reascent and eliminates restricting the air passage section.

The upper part in green color is made of much softer material. It makes less noise if bumped against the rocks and bends easily if it becomes blocked.

TECHNICAL SPECIFICATIONS

Colors: Black

Mouthpiece: Black Hypoallergenic silicone

Tube: Lower Semi rigid thermo polymer and upper soft rubber

BREEZE
SN111114

SHIFT

Soft, foldable snorkel which is ergonomically designed, built sturdy and durable - almost indestructible!

The diameter of the snorkel guarantees an excellent air exchange during ventilation and an easy ejection of water from inside once the diver reaches the surface.

TECHNICAL SPECIFICATIONS

Colors: Black

Mouthpiece: Black Hypoallergenic silicone

Tube: Semi rigid high-quality polymer

Includes snorkel keeper

SHIFT BLACK
SN113111

SLALOM

Unique shape of the snorkel perfectly adheres to the diver's head to improve hydrodynamics and is designed to reduce entry of water when on surface. The shape of the tube is very low profile and fits snugly on the side and is also ideal to enter caves without the risk of pegging the snorkel to the rocks.

FEATURES AND BENEFITS

- Ease of breathing: Section of the tube is increased to facilitate ventilation phases.
- Hydrodynamics: Thanks to tube's shape, water does not enter into the tube even in rough sea conditions.
- Oral Comfort: Soft silicone mouthpiece is very comfortable even after long hours under water.

TECHNICAL SPECIFICATIONS

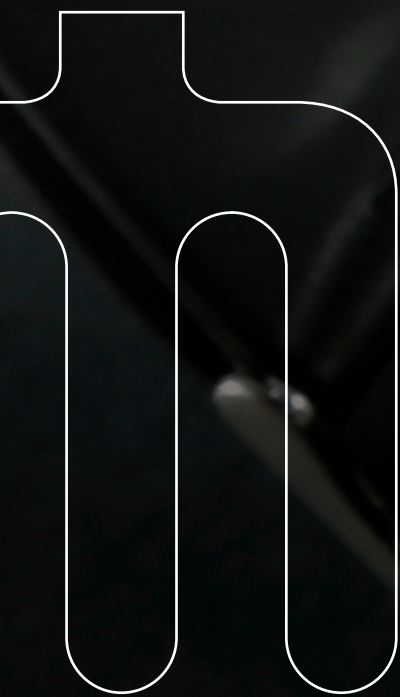

Colors: Black

Mouthpiece: Black Hypoallergenic silicone

Tube: Semi flexible High-quality thermo polymer

COMPUTER

MISTRAL

Straight forward apnea computer equipped with all the functions a spearo/freediver needs: The "dive" function is automatically activated when contact with water is made showing instantaneous depth, immersion time and water temperature. The recovery time is shown as soon as you are back on the surface. The computer stores data from the last 200 dives.

SPECIFICATIONS:

Current Time Mode

- Hour, Minute, Second display
- Month, Date, Day of Week display
- Auto Calendar from 2000 to 2099
- 12/24 hour format
- Month/Date or Date/Month display
- Hourly Chime
- Daily Alarm
- Temperature Display

Chronograph Mode

- Resolution : 1/100 second
- Range : 99 hours, 59 minutes, 59.99 seconds
- Split Time function

Countdown Timer Mode

- Resolution : 1 second
- Range : 99 hours, 59 minutes, 59 seconds
- Beep once per minute for last 10 minutes
- Beep once per 10 seconds for last minute
- Beep once per second for last 5 seconds
- Beep for 30 seconds when countdown to zero

Dive Mode

- Sea or Lake diving site selectable
- Automatically activate/deactivate Dive Mode when submerge or emerge to 1.5m of water depth.
- Current Dive duration, Depth, Dive site, Current Time, Maximum depth and Water temperature display
- Depth Unit : meter or feet selectable
- Depth resolution : 0.1m / 0.328 ft
- Maximum Depth : 100m / 328ft
- Automatic Dive log memory

Temperature Display

- Unit : °C / °F selectable
- Resolution : 1°C / 1°F
- Range : -10C to +60C / 14F to 140F

Dive Recall Mode

- Maximum 199 records to be recorded and recall
- Each dive record contains:
 - Record number
 - Starting Time and Date
 - Dive Duration
 - Maximum Dive Depth
 - Minimum Water Temperature
 - Dive Site Indication
- Delete current/previous/all records function

SPEAR GUNS

SK40

The SK-40 is the result of blending a sleek, rock-solid asymmetric carbon barrel with the minimalistic ONE handle and trigger mechanism: Super streamlined and extremely agile – the “stiletto” of the spearguns.

FEATURES AND BENEFITS

- Asymmetric carbon barrel for effortless movement under water.
- The Integrated shaft guide reduces drag and friction, allows for a clean flight and better aim at your target.
- “Minimalist” muzzle, one hole closed one open for a quick dual-band upgrade.

TECHNICAL SPECIFICATIONS

Barrel: Carbon infused with Polyurethane foam core

Shaft: 6.3mm Stainless steel America Shaft with shark fins

Bands: Performer2 circular bands o 1 x 16mm bands

Muzzle: 2 band capacity open muzzle

Stainless steel ONE trigger mechanism

Dyneema Wishbones

Sizes available in 80, 90, 100 cms

Compatible with all OMER reel models

cm

90	VR174004
100	VR174003

INVICTUS REX

The Invictus rex embodies a beautiful multicolored camouflage that perfectly aligns with the spirit of a demanding spearo, Be visible on the surface and invisible underwater!

FEATURES AND BENEFITS

- Minimally exposed Integrated shaft guide reduces drag and friction and assures accurate shot even when it is instinctive.
- New laser cut stainless steel trigger mechanism enhances sensitivity while shooting, even in configuration with several bands
- More comfort when loading and less noise while shooting thanks to the Dyneema wishbones and the America shaft with shark fins.

TECHNICAL SPECIFICATIONS

Barrel: 28mm cylindrical Extruded Aluminum HD multicolour camouflage

Shaft: 6.5mm Stainless steel America shaft with 3 shark fins (60-110)

6.75mm Stainless steel America shaft with 3 shark fins (130)

Bands: Performer2 bands o 2 x 14mm bands

Muzzle: 3 band capacity open muzzle

New LASER CUT Stainless steel trigger & release mechanism.

INVICTUS HF

Underwater hunting speargun with a camouflaged “Cuttlebone fish” shaped barrel to meet the needs of dedicated spearfishers.

FEATURES AND BENEFITS

- Unique shaped barrel to balance the speargun and as such, allows comfortable aiming during longer waiting times.
- The central part of the barrel is wider and serves as a hydraulic brake during the firing, absorbing part of the recoil.
- The generous internal volume of the Barrel allows the use of a heavier shaft without compromising its maneuverability.

TECHNICAL SPECIFICATIONS

Barrel: 28mm Hydroformed Aluminum with integrated shaft guide
Shaft: 6.5mm Stainless steel America Shaft with 3 shark fins (75-100)
 6.75mm Stainless steel America Shaft with 3 shark fins (110-130)

CAYMAN HF CAMU 3D

We present the famous Cayman HF gun with “Cuttlefish Bone” shape. The lateral gun movement is nice and easy and allows perfectly stable shot.

FEATURES AND BENEFITS

- “Hydroforming technology” offers Maximum stiffness for a perfectly stable and agile shooting.
- CAMU 3D camouflage finish is created by heat-transfer for a highly resistant and premium body.
- The Integrated shaft guide is kept minimally exposed so that drag and friction are reduced for a tactical shot even when it is instinctive.

TECHNICAL SPECIFICATIONS

- Barrel:** Hydroformed Aluminum with integrated shaft guide
- Shaft:** 6.5mm Stainless steel Tahitian shaft with notches
- Bands:** 1 x 18mm Performer 2 bands
- Muzzle:** Open muzzle with 2 band capacity (Allows dual band upgrade)
- Articulated Wishbones - French model
- Durable NYLON 6.6 trigger mechanism
- Sizes available in 75, 90, 100, 110, 130 cms

MATCH

“Half enclosed” reel available in two versions: 30 or 50m of 1,5 mm line capacity. Extendable handle and steel sliding line guide. The spool has two bushes which eliminate the friction on the spool shaft. Complete with a drag system which keeps the line in tension even with the friction completely open.

SIZE mm	MATCH
30 with line for Invictus/Cayman	RE113111
50 with line for Invictus/Cayman	RE113114

MATCH SPORT

Series of reels derived from the original design of the Match 50 reel but simplified to offer a competitively priced accessory. These reels feature the same anti tangle system, stainless steel line guide and locking friction. The handle is non retractable. The line capacity is 50 m with a 1.5 mm diameter line.

	WITH LINE
version for Cayman	RE114113

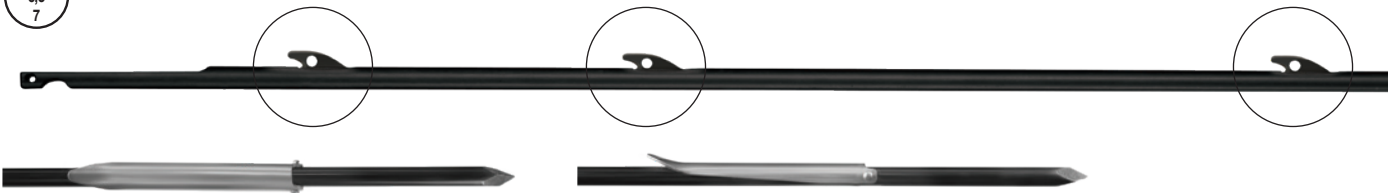

AMERICA

Shafts equipped with three small shark-fins resulting in better hydrodynamics and penetration through the fish. Each shark fin has a hole to allow the possibility to attach the shooting line. The shafts come in a natural satin finish and come standard with a point design that provides perfect penetration.

SPRING STEEL HR

Spring steel is used in different products, including swords, saw blades, springs and many more. These steels are generally low-alloy manganese, medium to high-carbon steel with a very high yield strength. This allows objects made of spring steel to return to their original shape despite significant deflection or twisting! Available in 6.5 or 7mm, equipped with three shark fins.

PERFORMER 2 BANDS

The PERFORMER2 bands are made from 100% natural latex. OMER uses gravity extrusion to maintain constant diameter and the mechanical properties of the band. Ideal for guns with 2 or 3 bands to combine an easy charge to an extremely high performance. These bands have been on OMER Spearguns for decades and proved to be strong, sustainable and very durable.

FEATURES AND BENEFITS

- Thicknesses 14, 16 or 18mm Diameter
- New 100% natural latex rubber.
- 750% Elongation
- Coated with a color layer, protecting from UV harm by sunlight and long term damage by salt water
- It features a very tight inner diameter hole.
- Available in 14, 16 and 18mm diameter.

MONOFILAMENT

High Strength 1.6mm monofilament line perfectly chosen for the rigging of a speargun.

Ø mm	m	KIT MONOLINE + 2 SLEEVES
1,6	5	MP131113

BUNGEE FOR BUOYS 2m

Swiveled 2 meter lined core bungee with additional 2 meters of stretch to reduce the impact waves pulling on the buoy. The stainless steel swivel also avoids the twisting of the line.

BUNGEE FOR BUOYS
MP118123

BUNGEE FLOAT LINE

The Omer Bungee Float Line is an amazing help for you when spearfishing with a buoy.

- The Bungee Float Line has a stretch of as much as three times its original length!
4m = dive 12 meters deep,
8m = dive 24 meters deep,
12m = dive 36 meters deep.
- With these features, less direct strain is placed on the float and during the dive the float line is vertically above the diver.

m	BUNGEE
4	MP118111
8	MP118112
12	MP118113

BUNGEE FLEX

Stretches to 200% and provides optimal safety due to the internal dyneema material, which is stronger than steel!

BUNGEE
MP1640601

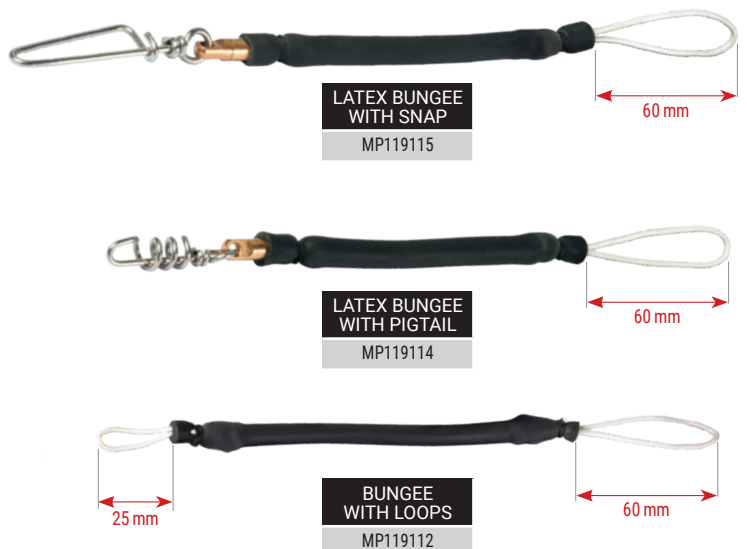

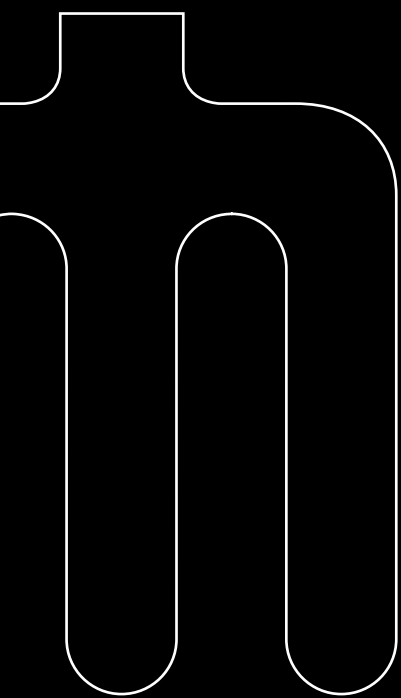

BUNGEEES

Muzzle Bungees specifically designed for Spearguns. Muzzle bungees act as shock absorber to keep the shooting line tension on Spearguns.

The SNAP-CLIP is made up of a piece of latex hollow tubing with a spiraling double line in the center that elongates up-to-three times its original length and has a high strength snap-clip that swivels 360 degrees, making it easy-to-remove-and-hook to the Shooting Line.

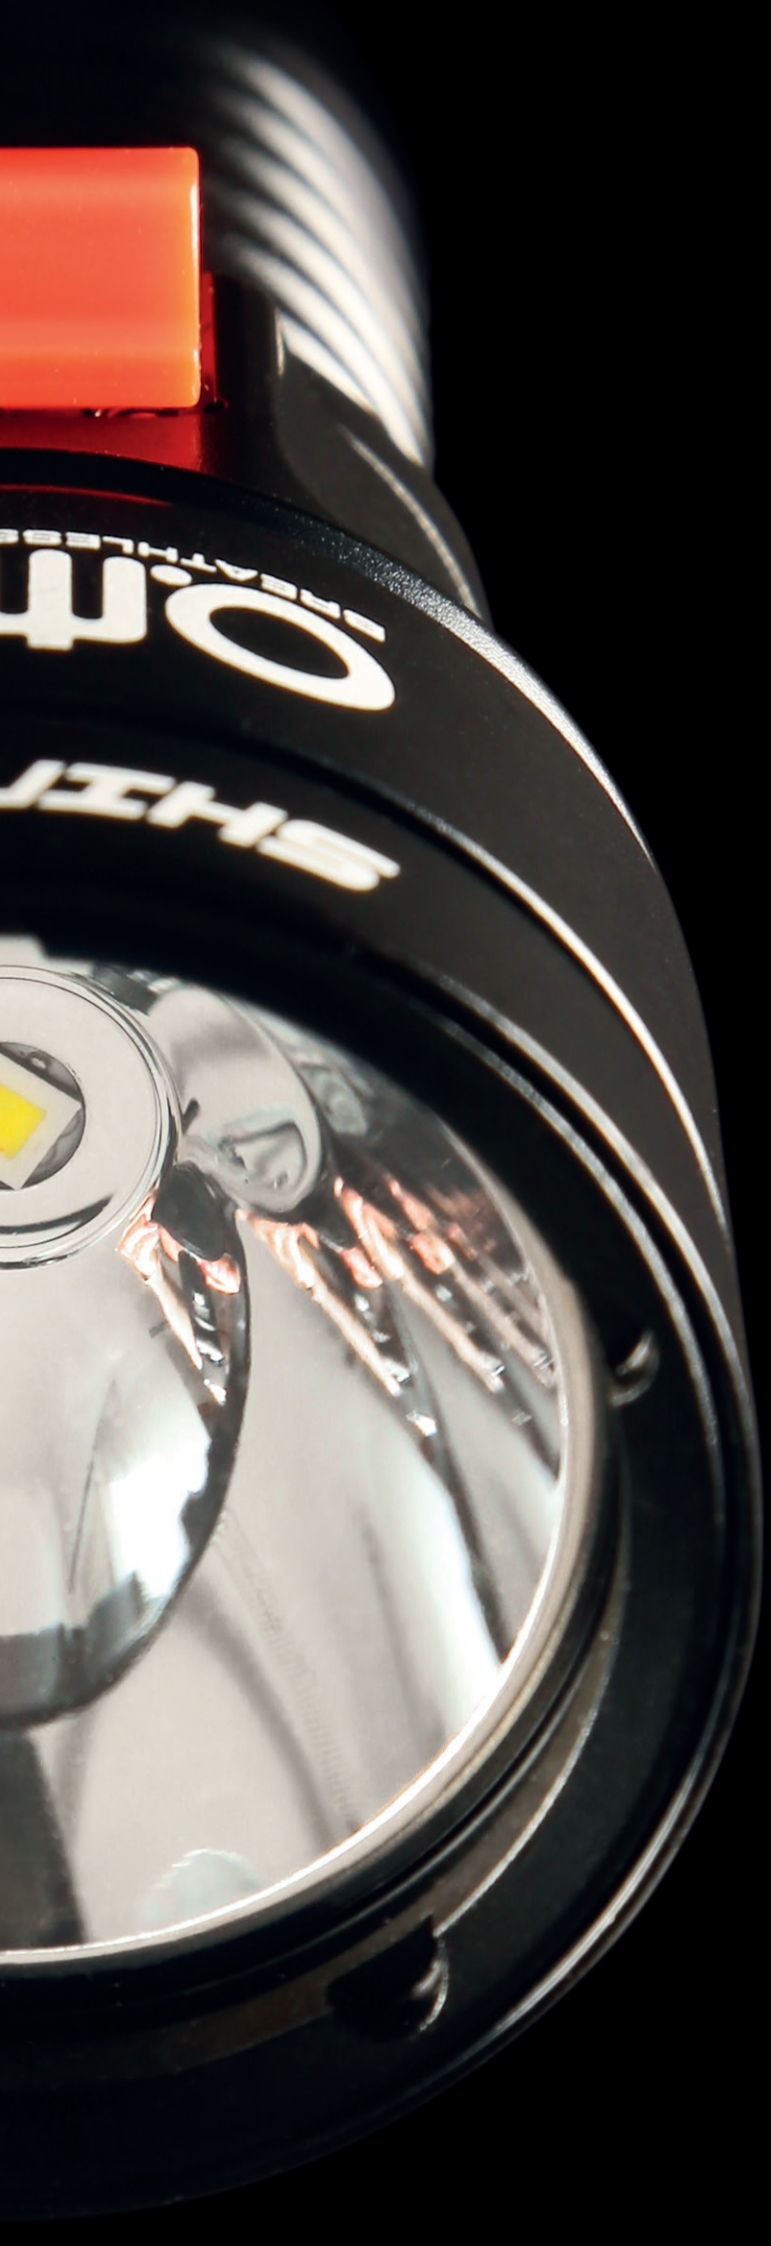

The PIGTAIL Features the same quality as the snap clip with the exception that the swivel design is shaped like a pigtail swivel. The pigtail swivel avoids the chances of accidentally forgetting to re-snap the swivel and is preferred by some divers over the more traditional snap-clip design.

DIVE EQUIPMENT

DIVE EQUIPMENT

STARDUST XL 28.000 LUX

Torch now more powerful (28.000 lux - 1.200 lumen - 3 hours of continuous use), in anodized aluminum, equipped with return spring (removable) on the switch to prevent accidental flashlight ignition, elastic band wrist, rechargeable battery via micro-USB.

STARDUST XL
HG128113

EYELIGHT II 26.500 LUX

Flashlight designed for the most demanding freediving fishermen. Anodized aluminum body and red power button with return spring (standard supplied with an alternative button without return spring).

It is equipped with a rubber block for the switch that can be attached to the elastic line. The flashlight is recharged by a micro-USB cable included in the package.

An elastic line allows you to quickly remove it from your wrist. It is sold accompanied by a rigid transport case. 26.500 lux, 1.000 lumens, 1 h and 30 min of continuous use.

EYELIGHT II
HG128114

DIVE EQUIPMENT

SHINY II 21.000 LUX

Flashlight designed for freediving. Anodized aluminum body and red power button with return spring (standard supplied with an alternative button without return spring).

It is equipped with a rubber block for the switch that can be attached to the elastic line. The flashlight is powered by three AAA batteries.

An elastic line allows you to quickly remove it from your wrist. 21.000 lux, 800 lumens, 1 h and 15 min of continuous use.

SHINY II
HG128112

BELT POCKET

A utility belt pocket to carry dive light, canteen or other objects.

BELT POCKET
MP134116

LASER

This 420 stainless steel LASER knife is a benchmark on the market of spearfishing knives: One side is a straight cutting edge and the other is serrated, the tip is a sharp point. The 9 centimeter blade design makes it very versatile for any type of cut and for the final "finishing" maneuver.

The locking system of the LASER works with two release hooks, with a slight pressure on each side, the knife is released from the sheath. An accidental release by pushing only one side of the mechanism is impossible!

The design of the sheath allows versatile attachment points: On your leg with two standard rubber straps, your arm with a fabric rubber loop or a belt attachment with the integrated clip. The keyhole in the sheath allows the spearo to pull a stuck shaft from the reef with more power or to straighten a bent shaft by the knifehandle leverage.

LASER

KN111114

MINI LASER

This 420 stainless steel MINI LASER knife is a benchmark on the market of spearfishing knives: One side is a straight cutting edge and the other is serrated, the tip is a sharp point. The 8 centimeter blade is coated for extra corrosion resistance. Its design makes it very versatile for any type of cut and for the final "finishing" maneuver.

The locking system of the MINI LASER works with two release hooks, with a slight pressure on each side, the knife is released from the sheath. An accidental release by pushing only one side of the mechanism is impossible!

The design of the sheath already includes the perfect attachment on your upper arm - where you have easy and fast access. The velcro closure flexible strap is very wide and soft for the best comfort.

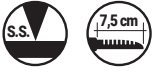

The keyhole in the sheath allows the spearo to pull a stuck shaft from the reef with more power or to straighten a bent shaft by the knife handle leverage.

LINE WINDERS

Professional Line Winder - this floating system is made of a highly visible polypropylene, so it can be seen clearly on the water. The handle and the loop angles make the line handling quick and very easy.

The holes in the ends can be used for various purposes: Clip the end of the line to achieve a streamlined transportation setup, add extra accessories or even connect the line winder to your float.

PROFESSIONAL
TH168002

Simple, lightweight and quick: The LINE WINDER made of polymer never corrodes and holds plenty of line for your spearo adventures.

LINE WINDER

MASTER TORPEDO

Reinforced, double walled surface marker: The inner air chamber is made of a strong polymer but the outer nylon shell provides extra strength for tough conditions. Line and flag included.

MASTER TORPEDO

FL1340801

MASTER SPHERE

Round floats are generally easy to see - the flag is positioned at the highest place and therefore, can be seen from far away. Flag, pole, line and clip included.

MASTER SPHERE

NEW TORPEDO

Torpedo shaped buoy with single chamber. Several included buckles provide a possibility to hang various accessories.

It includes:

- Buoy
- Alpha Flag
- International Flag
- Floating line
- size: 82 x 24 cm

NEW TORPEDO

DIVE EQUIPMENT

ATOL

This float is manufactured in 420D Nylon with two inside air chambers in very resistant PVC material. Atoll is highly visible from great distances, thanks to the 30cmx30cm flag positioned on top of a 95cm long rigid flag pole (two pieces) and thanks to the bright red color of the top part. The bottom of the float is white to reduce its visibility to the fishes.

Some marker buoys are of a single skin design, these are the cheaper option, as the single skin construction is less resistant to punctures than that of a double skin design. The double skin buoy consists of an inner bladder and an outer cover. The outer cover is made from a strong puncture resistant material. More expensive marker buoys often have pockets for storing spares or snacks, as well as having loops and straps to attach your speargun(s).

FISH CALLER

Game fish are naturally curious and may check you out, the OMER fish caller will help bring them in even closer. The fish caller allows you to produce a ticking sound to intrigue fish and make them come closer.

When you are on the bottom, produce a few ticks and alternate with pauses of silence.

Adjustable to fit different widths of gloves or other places on your equipment.
